

DEP SERVICE LINE INVENTORY

The MMA conducted a DEP Service Line Inventory for the Lead and Copper Rule and submitted to DEP in 2024.

The service line inventory for the Lead and Copper Rule (LCRR) definition in 2023 includes the identification and classification of the service lines used in community and non-transient non-community water systems. The inventory must include all service lines, regardless of their actual or intended use, and classify them into categories such as lead, galvanized requiring replacement (GRR), non-lead, and unknown.

If you would like to review the DEP Service Line Inventory, please contact Jodie Sheaffer at the MMA Office at 570-541-4008.
